ANMERKUNGEN DES MAKLERS:

This historic motor yacht, probably the last of its kind, was built in 1892, according to a design by the Dutch naval architect Gerard De Vries Lentsch. Later named as "Brave Mollie" the vessel served as the model for the Royal Yacht "Piet Hein" built for Queen Juliana by the same designer.

She is a famous long range ship, illustrated by the fact that she has been used for films such as "That

Riviera Touch" in 1966. The unique atmosphere on board inspired artists of all sorts.

In 1954 the canoe stern motoryacht was equipped with a 360 Hp Deutz diesel engine in Holland although, this was later upgraded again in 2015 for a modern MAN 6 cylinder diesel of 380 Hp. Back in the Mediterranean, she spent a long period cruising the French Côte d' Azur. In 1979 the "Brave Mollie" was renovated at the well-known Amsterdam shipyard "Het Fort" in order to maintain her magnificent condition. After sailing these last years in the Atlantic and the Mediterranean the yacht was taken to the Spanish shipyard of "Vatasa" in 1987 where the most important renovation was carried out over a period of two years. The romantic character of the original construction, dating from the end of the 19th century, was fully preserved.

She combines the romanticism of days long past with modern comfort, and this is what makes cruising with her such an unforgettable experience.
